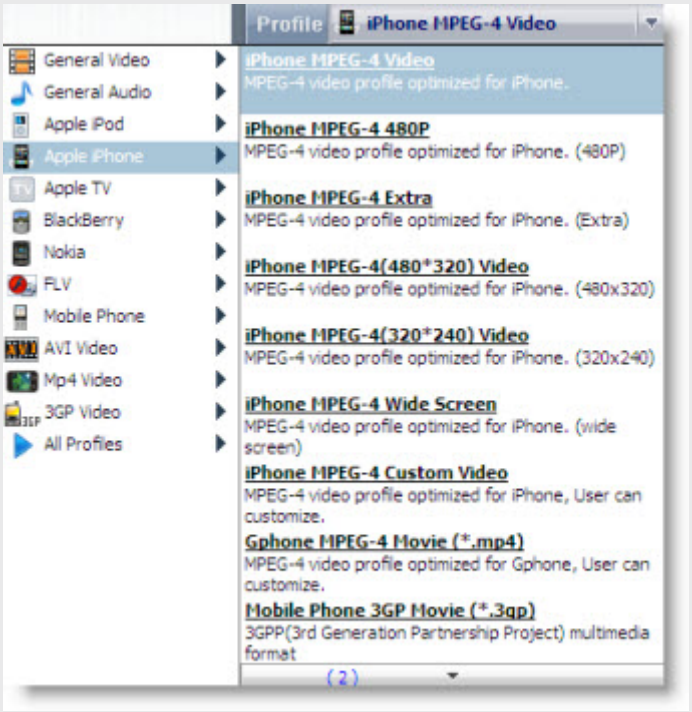
Step 2

Click the "Add Video" button to import video files. Alternatively, you can click "File -> Add Video Files..." to load the videos that you want to watch on your iPhone. After the videos are imported, there will be a list of video file items showing in the program.

Step 3

From the "Profile" drop-down list, navigate to the "Apple iPhone" category and choose the most appropriate output format for your iPhone.

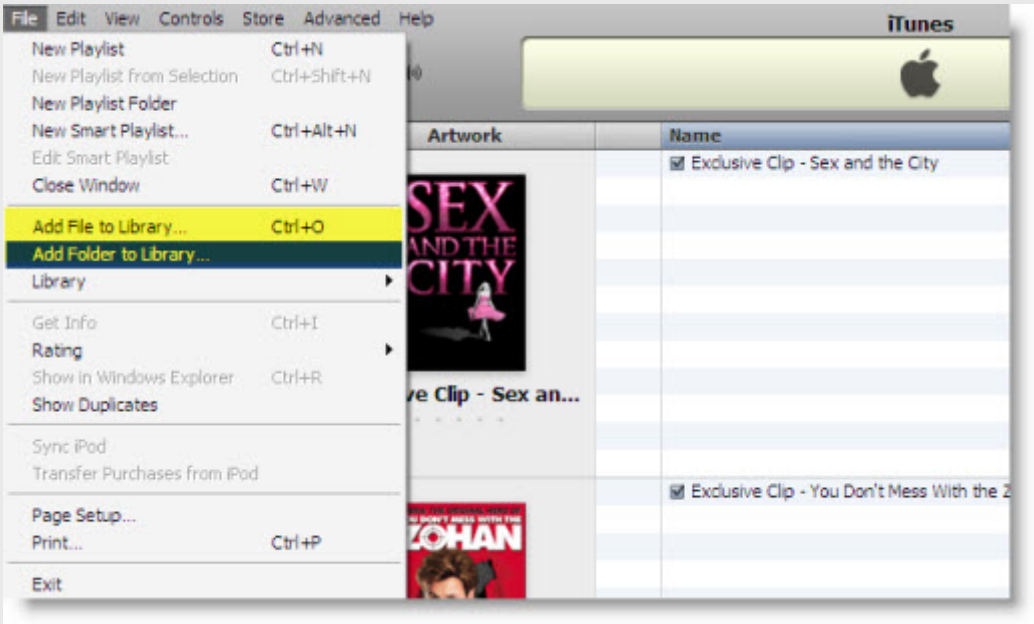


Step 4

Click the "Start Encode" button to start to convert video files for your iPhone. **Note:** The output files are easily available by clicking the "Folder" botton in the main interface after the encoding process.

Step 5

Launch your iTunes. Connect your iPhone to your PC. In iTunes, click "File -> Add File to Library..." or "File -> Add Folder to Library..." to import video file(s) you just converted for your iPhone. Transfer the converted videos to your iPhone with the sync of iTunes library.



The steps are quite simple. However, there are some useful tips and tricks we can take a look at while using Clone2Go Video to iPhone converter to convert videos to iPhone.

Tip 1. Trim the video

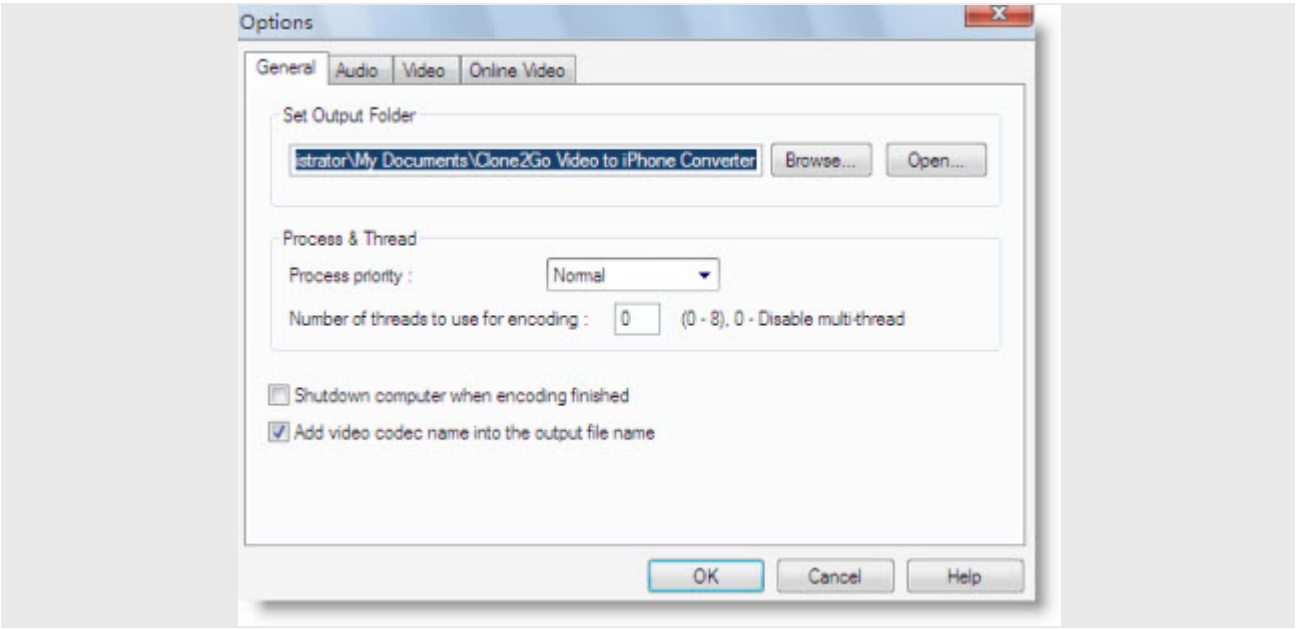
Sometimes, we don't need the whole video file for viewing on iPhone. In this case, you can use the "Trim" function to get the exact clip from the video. There are two methods to trim the video using Clone2Go Video to iPhone Converter. Click here to learn more.

Tip 2. Custom profile for the output

You can also customize a specific profile to meet your needs. Click here to learn more.

Tip 3. Specify the output folder

Click the "Options" button on the main interface. In the "General" tab, you can specify the folder for the output file.



Options
General
Audio
Video
Online Video
Set Output Folder
istrator\My Documents\Clone2Go Video to iPhone Converter
Browse...
Open...
Process & Thread
Process priority :
Normal
Number of threads to use for encoding :
0
(0 - 8), 0 - Disable multi-thread
Shutdown computer when encoding finished
Add video codec name into the output file name
